

## LIGHT WEIGHT | MULTIFUNCTIONAL

The Labino tripod is a professional, multifunctional stand that suits all our LED torches – the Astra Torch as well as the UVG2 & 3 and White light torch!

It is possible to place it on a table or on the floor, as well as wrap it around something, i.e. a small tree, a table base or some other kind of pole, to get the perfect view.

The tripod is very light and therefore perfect to bring out on the field.

The stand gives you two hands to work with – an advantage in almost every application.

## TECHNICAL SPECIFICATION

### Description

- Weight: 200 gram
- Height:
  - 265 mm excluding clamp
  - 340 mm including clamp
- Dimension of the each leg: 25 mm
- Color: Black and grey

### Material

Plastic: ABS

### Manoeuvre and Usage to get the best result

If using the Tripod together with a Torch Light UVG2, 3 or White, you do not have to consider in what position you place the “legs” of the tripod.

If you are using the tripod with the Astra Torch, it's preferable to put the legs in a 90 degree position to achieve the most stable position.
